<b>Peter Bertacci, GD Navy Contracts</b>	
15B. CONTRACT OFFICER  <i>Peter Bertacci</i> (Signature of person authorized to sign)	15C. DATE SIGNED 11/15/02
16B. UNITED STATES OF AMERICA  <i>Carla J. Brown</i> (Signature of Contracting Officer)	16C. DATE SIGNED 11/15/02

Accordingly, the following changes are made:

1. Block 10 of the DD Form 1155 is revised to read "03 Feb 04".
2. Under Section B – Supplies/Services and Prices/Costs, Item Number 0023 is hereby added as shown below:

<u>ITEM</u>	<u>DESCRIPTION</u>	<u>QTY</u>	<u>UNIT</u>	<u>UNIT PRICE</u>	<u>AMOUNT</u>
0023	CLIN 0700 – Customized Product Solution - Single Forest/Single Domain Active Directory Architecture	1	LOT	\$2,785,876.00	\$2,785,876.00

3. Under Section C - Description/Specifications/Work Statement, work for Item 0023 shall be performed in accordance with the Task Requirements Notice (TRN) entitled "BLII OCONUS Single Forest Single Domain (SFSD) Emergent Requirement" and included as Attachment "D" to this modification.

4. Under Section F - Deliveries or Performance, the following is added:

The period of performance for Item 0023 is from the effective date of this modification through 1 December 2002. The contractor shall deliver updates to all necessary documentation including, but not limited to, a typical server farm design, the Implementation Management Plan (IMP), the BLII OCONUS Schedule, a typical System Design Document (SDD) and a test procedure overview.

5. Under Section H – Special Contract Requirements, the clause entitled "Partial Payments" is hereby modified as follows:

a) Partial payments for Items 0001 through 0022 are authorized based on the following schedule:

5% of the contract price at delivery of the final Implementation Management Plan (IMP)

for each of the 16 locations:

- 20% of the total area contract price at completion of Phase I Critical Design Review (CDR)
- 20% of the total area contract price at completion of Phase I Base Design Plan (BDP)
- 5% of the total area contract price at completion of Phase II BDP
- 10% of the total area contract price at network equipment acceptance at the NI Lab (Needham, MA)
- 10% of the total area contract price at completion of 30% outside plant (OSP) construction\*
- 8% of the total area contract price at completion of 60% OSP construction\*
- 2% of the total area contract price at completion of 100% OSP construction\*
- 15% of the total area contract price at completion of system operational verification and test (SOVT)
- 5% of the total area contract price at the submission of the final as-built drawings

\* NOTE: Percentage is based on total linear footage of new OSP implementation

b) Partial payments for Item 0023 is authorized based on the following schedule:

100% of the price for Item 0023 at completion of all required effort and acceptance of all deliverables

c) Partial payments for Items associated with building and drop count additions/deletions and Defense Base Act costs are authorized based on the following schedule:

40% of the total Item price at completion of or update or red line Base Design Plan (BDP)

20% of the total Item price at completion of 30% OSP construction\*

15% of the total Item price at completion of 60% OSP construction\*

5% of the total Item price at completion of 100% OSP construction\*

15% of the total Item price at completion of system operational verification and test (SOVT)

5% of the total Item price at the submission of the final as-built drawings

\* NOTE: Percentage is based on total linear footage of new OSP implementation

6. Under Section H – Special Contract Requirements, the following clause is hereby added:

#### USE OF MULTIMODE EXTENDERS

The Contractor may use multimode (MM) extenders to utilize existing (MM) fiber runs to achieve gigabit ethernet connectivity and such use shall be in full compliance with the requirements of the Task Requirements Notice (TRN). The guidelines for using MM extenders shall be as follows:

- a. All newly installed OSP work will be performed with SM fiber, unless MM is specifically approved by SPAWAR.
- b. For OSP, MM fiber will only be included in the BLII Design and implementation for runs where MM fiber currently exists and is unused.
- c. MM fiber will not be used for OSP runs between the following switches: distribution to core; distribution to distribution; aggregator to distribution/core; and aggregator to aggregator.
- d. The maximum distance that MM extenders may be used for OSP runs is 2Km subject to the above restrictions.

7. Under Section H – Special Contract Requirements, the following clause is hereby added:

#### **REQUIREMENTS PRICING MODEL**

The Contractor shall utilize the Requirements Pricing Model as a method of calculating proposal prices for the following actions:

- 1) all building and drop count additions;
- 2) all diverse route work for all Priority 1 building additions; and
- 3) all costs associated with complying with the Defense Base Act.

Additionally, the Model may also be used to calculate prices for contractor requested reuse associated with new buildings if the government determines that reuse cannot be granted or if reuse has been granted by the government but the items granted reuse become unavailable for reuse.

The parties agree that use of the Model shall not be required for all additions. The following additional guidelines and business rules shall apply regarding use of the Model :

1. The model is applicable for all site user/building additions received to date.
  2. The model will apply for all future site user/building additions made within sixty (60) days after Phase I CDR.
  3. The model will not necessarily apply for any site at which the site user/building additions exceed 20% of the effort at that site. A 20% increase is defined as a 20% delta in the number of users, buildings, or feet of fiber. Applicability of the model in these instances will be agreed upon at the time of the addition.
  4. OSP and/or ISP conditions that differ significantly from the norm will be proposed and documented in addition to the model itself and will be negotiated between the two parties.
  5. The model shall not be used for additions of a total area.
  6. Applicability of the model for buildings without switches will be agreed to on a case-by-case basis.
8. Under Section J- List of Attachments, the following attachments are hereby added:

Attachment D - TRN entitled “BLII OCONUS Single Forest Single Doman (SFSD)  
Emergent Requirement”

Attachment E - NMCI OCONUS Implementation Prioritization List and BLII  
OCONUSUser Count Baseline List

Attachment F – Revised Matrix under TRN paragraph 6.0

9. Paragraphs 5.1.4, (a), (b), and (c) are deleted from the TRN entitled "Navy and Marine Corps Intranet (NMCI) OCONUS Design and Implementation", Attachment A to the original order, and are replaced with the "NMCI OCONUS Implementation Prioritization List and BLII OCONUS User Count Baseline List", Attachment E to this order.
10. Under the TRN entitled "Navy and Marine Corps Intranet (NMCI) OCONUS Design and Implementation", Attachment A to the original order, the matrix under paragraph 6.0 is deleted in its entirety and replaced with the revised matrix, Attachment F to this modification.
11. Both parties agree that the above agreements are final and complete resolution for contract price or delivery schedule, or both, for any and all efforts related to the following: (1) Single Forest Single Domain, (2) all diverse route work for Priority 1 buildings, (3) all costs associated with complying with the Defense Base Act, (4) gigabit ethernet, and (5) all issues relating to reuse.
12. The above changes result in an increase to the overall price of order NS40 by \$2,785,876.00 from \$119,687,610.75 to \$122,473,486.75. Except as modified herein, all other terms and conditions of order NS40 remain unchanged and in full force and effect.

## **TITLE: BLII OCONUS SINGLE FOREST SINGLE DOMAIN (SFSD)**

### **1.0 Introduction**

Single Forest Single Domain (SFSD) is an emergent requirement recently identified by the fleet and therefore not originally priced under the original BLII OCONUS delivery order. The current strategy and direction for the Navy within the BLII OCONUS arena is to establish a trusted relationship between the three regions (Far East, European and Middle East).

### **2.0 Applicable Documents**

- a. TRN N68939-97-D-0041 DELIVERY ORDER NS-40 V20
- b. NMCI OCONUS Notional Architecture Framework V4.1

### **3.0 Requirements**

The contractor shall initiate Single Forest Single Domain (SFSD) Active Directory architecture to create a Navy BLII OCONUS Intranet. The contractor shall update all necessary documentation, including but not limited to a typical server farm design, Implementation Management Plan (IMP), BLII OCONUS Schedule, a typical System Design Document (SDD), and test procedures overview.

The contractor shall ensure the Original Equipment Manufacturer (OEM) has not declared server farm hardware as End Of Life (EOL).

The contractor shall ensure the software deployed throughout the enterprise is common. This will allow a common operational environment throughout BLII OCONUS.

The contractor is encouraged to present creative solutions to the government that have potential to accelerate the implementation and accommodate the early completion of BLII OCONUS projects.

### **4.0 Deliverables**

The contractor shall deliver a Single Forest Single Domain (SFSD) package which include the following:

- BLII OCONUS Logical Outline
- Unclassified Forest Root Domain
- Unclassified Child Domain
- Organization Unit (OU)
- BLII OCONUS Site and Replication Outline
- Active Directory Components
  - Domain Controller
  - Global Catalog Server
- Active Directory Model Breakdown
